ALUMINUM DOUBLE SHEAR BEARING BIRDCAGE

We use only the best 6061-T6 aluminum alloy to produce these floaters. The double shear design, and equally spaced mounting holes around the barrel circumference produce a cage that doesn't distort the barrel's shape, allowing for smooth operation and no locking of bearing. Adjustable shock mounts are mounted with 7/16" bolts. Plates have 1/2" mounting holes.

Includes: Shock mounts, High misalignment bushings, Birdcage with bearings.
PPM2671 Retaining rings NOT included

Feel free to call to verify proper chassis & model.

Brake mount sold separately depending on your application.
